PROFESSIONAL SUMMARY

Senior iOS Engineer with 4+ years of experience building and scaling consumer and enterprise applications using Swift, SwiftUI, UIKit, and modern iOS architectures.

- Led **modularization** of core HRMS modules, migration to a new design system, and refactoring of legacy network layers to **Swift structured concurrency (async/await)**, significantly improving performance, stability, and development velocity.
- Experienced in designing end-to-end features, integrating **RESTful APIs** and cloud services, and driving quality through **XCTest-based automation**, crash reduction, and **memory profiling**.
- Collaborates closely with product, design, and QA to deliver high-impact, user-centric features used daily by thousands of users.

TECHNICAL SKILLS

- **Languages & Framework:** Swift, SwiftUI, UIKit, Combine, Objective-C, CoreBluetooth, Apple Maps
- **Architecture Patterns:** MVC, MVVM, Redux, Modular Architecture, VIPER, Clean Architecture
- **Data & Storage:** Core Data, Realm, SwiftData
- **Development Tools:** Xcode, Git/GitHub, CircleCI, Jenkins, Jira, SourceTree, Proxyman, Postman, Figma, Adobe XD
- **Analytics & Monitoring:** Firebase Analytics, Firebase Crashlytics, Gainsight
- **Quality & Performance:** XCTest, Unit Testing, Memory Profiling, Leak Detection, Performance Optimization, Agile/Scrum

PROFESSIONAL EXPERIENCE

Senior iOS Developer | Keka Pvt Technologies Ltd

Oct 2024 – Present | Hyderabad, India

- Led modularization of the Keka iOS app, migrating Leave and Payroll modules into independent, reusable components to improve maintainability, scalability, and accelerate feature delivery timelines.
- Refactored a legacy GCD-based network layer to Swift structured concurrency (async/await), enabling cleaner APIs, seamless SwiftUI integration, and measurable performance improvements.
- Drove adoption of a new design system and led a comprehensive UI/UX revamp, improving consistency and usability across critical HRMS workflows used by thousands of employees.
- Performed in-depth memory profiling and optimization, reducing application hangs and memory leaks by about 15% and contributing to improved app stability and app size reduction.
- Collaborated with product managers, designers, and QA in an agile environment to ship high-impact HRMS features including Leave Management, Payroll, and Attendance.

iOS Developer | Webappclouds LLC

Jul 2024 – Oct 2024 | Remote

- Implemented new features to enhance user experience and functionality of the core product in a fast-paced environment.
- Led development efforts with a team of three iOS developers while utilizing CircleCI for continuous integration and Jira for planning and tracking.
- Used Jenkins and Adobe XD for CI and design adoption, ensuring smooth design-to-code handoff.
- Implemented automated testing procedures using XCTest, reducing bug identification time and improving application stability.

iOS Developer | Mutual Mobile

Mar 2022 – Jul 2024 | Remote

- Spearheaded development of new iOS features to enhance product functionality across multiple client applications.
- Managed crash tickets and resolved critical bugs, improving app stability and reducing crash rates.
- Implemented XCTest-based automated tests, increasing code robustness and reducing regression issues.
- Coordinated with a 24-member cross-functional team to deliver features in an agile setup.
- Collaborated with the Design team to integrate custom animations and transitions, significantly improving user experience.

iOS Developer | Mutual Mobile

Mar 2022 – Jul 2024 | Remote

- Spearheaded development of new iOS features to enhance product functionality across multiple client applications.
- Managed crash tickets and resolved critical bugs, improving app stability and reducing crash rates.
- Implemented XCTest-based automated tests, increasing code robustness and reducing regression issues.
- Coordinated with a 24-member cross-functional team to deliver features in an agile setup.
- Collaborated with the Design team to integrate custom animations and transitions, significantly improving user experience.

KEY PROJECTS

Keka – Enterprise HRMS Platform

- Led modularization of **Leave, Attendance & Payroll** modules, improving maintainability, scalability, and delivery speed.
- Spearheaded adoption of a new design system and drove a complete UI/UX revamp for better usability and consistency.
- Reduced application hangs and memory leaks by 15% through detailed memory profiling and optimization.
- Refactored the legacy GCD-based network layer into **Swift structured concurrency (async/await)**.

Dealerware – Enterprise Car Dealership App

- Built an app for dealership staff to quickly access inventory and customer data, improving data retrieval speed by around 20%.
- Used SwiftUI, UIKit, CoreBluetooth, and Core Data along with REST APIs to deliver robust functionality.
- Added apple map support for live tracking and pinning the stores.

EveryParent (CSC) – Parenting & Child Development App

- Implemented personalized recommendations and interactive features that increased user engagement.
- Used **Redux architecture, SwiftUI, SwiftData, Apple Maps, and Push Notifications** to build a scalable and responsive app.
- Led a team of three engineers, ensuring timely delivery and adherence to quality standards.

Easy Ride – Solar Battery Cycle App

- Implemented QR code-based checkpoint scanning for users to easily start rides and select destinations.
- Developed a billing system based on distance travelled and applicable taxes using UIKit, Core Maps, and MVVM.

EDUCATION

- **Master of Computer Applications (MCA)** Indira Gandhi Institute of Technology, Dhenkanal – 2021
- **Bachelor of Science (B.Sc.)** Vikram Dev Autonomous College, Jeypore – 2018

CERTIFICATIONS

- **iOS 15 Development Essential Training** – LinkedIn
- **Swift 5: Protocol-Oriented Programming** – LinkedIn
- **SwiftUI Essential Training** – LinkedIn
- **Xcode Developer Tools in iOS** – LinkedIn
